

Dear students!

Please work on the following tasks for the upcoming week:

- 1) Think about inventions that are very important for you and that you use very often. Make a list of the top 5 of these inventions and note down why they are so important for you.
- 2) Have a look at page 102 in your textbooks and write down the inventions and what you use them for. You can make a chart:

invention	function
bicycle	get some fresh air and exercise =)
Smartphone	...
...	

- 3) After that, go to page 92 in your workbooks and work on B1.

I miss you all! =(

Yours, STRÜ
